

Married Love

2022

Strong marriages are the bedrock of society and the foundations of healthy, happy families. This course aims to fortify the bond between husband and wife by giving them the tools to work through challenging scenarios where communication, intimacy and work/life balance come into play.

Over several months each couple will have the opportunity to problem solve five case studies together, in small groups and with the course cohort. Each participant will come away from the course with a skill set which will enable them to address similar situations in their own married lives.
