

# PRE-ADOLESCENCE

## 9-13 YEARS

For parents with children aged 9 to 13. This course provides parents with the tools and insights required to help their pre-teens develop the virtues and skills needed to become resilient and responsible adults.

Parents will discover the role of temperaments in the behaviour of their children and address ways to build character. They will navigate the relationship between freedom and authority and help their children flourish by guiding them through the proper use of their time. The course will also assist couples to explore and develop their very own personal and family plan.
